

CODEJET

Creative Design / Surpass Tradition

Fast · Easy operation · Economy

CODEJET printer is a multi-function variable data printing system. It is a new high-resolution 600DPI developed by Hewlett-Packard Company of the United States based on HP TIJ2.5 generation (thermal foaming inkjet) technology.

The high printing speed is 150 meters / Minutes of industrial printing system, can be used with a variety of packaging printing platforms, can be used as carton, soft film, label, paper, metal.

Product details

Highlights

- Support cascading of max 6 sets of CODEJET.
- Support printing real time data and database.
- Support simulation speed and simulation sensor to print.
- Work together with HP HISS-V2 ink supply system, which can make the print cost lower max to at least 55%.

Parameters

Print height

CODEJET-1	12.7mm
CODEJET-11	2*12.7mm
CODEJET-111	3*12.7mm
CODEJET1111	4*12.7mm
CODEJET-2	25.4mm
CODEJET-21	25.4mm+12.7mm
CODEJET-22	2*25.4mm
CODEJET-4	50.8mm
CODEJET(24)	24*12.7mm

Print speed &Resolution

36m/min@ 600 × 600DPI
 150m/min@300 × 300DPI
 300m/min@300 × 150DPI

Interface type

Network/ Sensor/Encoder/Warning light

Print content

Text, Counter , Date, Variable barcode,
 Image, Real time data
